AI Answer

Past students give several pieces of advice for succeeding in their first co-op:

1. Build Relationships and Network:

- Join colleagues during lunch instead of eating alone to connect better (Source 1).
- Engage with colleagues and learn about their roles to show genuine interest and leave a positive impression (Source 3).
- Actively build relationships and take initiative in networking, including reaching out for coffee chats with other teams (Source 4).
- Regularly communicate with colleagues and seek feedback; learn about other departments and offer help on cross-functional projects (Source 5).
- Attend intern and corporate events to network (Source 6).

2. Practice Self-Management and Organization:

- Take notes on new concepts and solutions to stay organized and involved in learning (Source 1).
- Prioritize tasks effectively, meet deadlines without constant supervision, and break large projects into manageable tasks to avoid feeling overwhelmed (Source 2).
- Stay organized, meet deadlines, and handle tasks independently (Source 5).

3. Be Proactive and Curious:

- Approach the co-op with a mindset of learning, curiosity, and professionalism.

- Ask questions, take initiative, and set personal goals (Source 2).
- Smile, listen carefully to instructions, and ask for help when needed (Source 6).

4. Set Goals and Align with Team:

- Create work term goals and regularly review and adjust them with your supervisor to maximize learning and stay challenged (Sources 3, 5).
- Ask your manager about goals you should have to be successful and align your personal goals with the team's goals (Source 6).

5. Make the Most of the Experience:

- View co-op as an opportunity to explore careers and network (Sources 1, 2, 3, 4, 5, 6).
- Reflect on what you would do differently to improve your experience, such as networking more or being more engaged (Sources 1, 3, 4).

In summary, past students emphasize building strong relationships, managing yourself well, being proactive and curious, setting and aligning goals, and actively making the most of the co-op opportunity to succeed in their first co-op.

gement is important and contributes to workplace success. One aspect of self-management for me is taking notes. I try to write down new concepts I've learned (especially domain-specific ones), step-by-step solutions for problems I've encountered (helpful if I face them again), and so on. This habit helps me stay organized and more involved with my learning. 7. After You Are Hired: Co-op is an opportunity to explore careers and network. How would you encourage students to make the most of their co-op experience and form a good impression? Thinking back on your own co-op, what would you have done differently? I would encourage students to: • Build trust early on • Join your colleagues at lunch • Ask questions about the company and product

At my first co-op I often ate lunch at

ficiently the more you can learn and make the best out of your co-op term. It's a foundational skill that directly influences professionalism and accountability within your workplace. Prioritizing tasks effectively, ensuring you meet deadlines without needing constant supervision, and breaking larger projects into smaller, manageable tasks can prevent the feelings of overwhelm.

7. After You Are Hired: Co-op is an opportunity to explore careers and to network. How would you encourage students to make the most of their co-op experience and form a good impression? Thinking back on your own co-op experience, what would you have done differently?

During your co-op, I recommend engaging with colleagues and taking the time to learn about their roles within the company. This not only leaves a positive impression but also demonstrates genuine interest. During my first co-op, I regretted not networking more and connecting with individuals in roles I was interested in. For example, since I was interested in systems engineering, I could have reached out to a systems engineer to learn more about their work.

8. Goal Setting: Creating work term goa

s to make the most of their co-op experience and form a good impression? Thinking back on your own co-op experience, what would you have done differently? To make the most of a co-op experience, I encourage students to actively build relationships and take initiative in networking. During my first co-op, which was mostly remote, I focused on building strong relationships within my team. This led to an opportunity to return in a part-time role after my term ended. In my second co-op, I worked in person at a larger organization and took advantage of the environment by reaching out to other teams for coffee chats. These conversations helped me learn about different roles and ultimately led to an opportunity to return for another term with a different team. Being engaged and showing w
