AI Answer

Students gave several pieces of advice about applying to co-op jobs based on their experiences:

- **Apply broadly and persistently:** One student recommended applying for many co-op positions, regularly checking multiple job boards throughout the semester, and being persistent even if you face rejections. They emphasized that you will likely apply to many jobs before securing one and encouraged not to get discouraged (Source 3).
- **Apply even if you don't meet all requirements:** Another student advised not to be afraid to apply for positions even if you don't have all the qualifications listed in the job posting (Source 2).
- **Focus effort on applications you are passionate about:** While applying broadly is important, putting more thought and effort into applications for positions you are really interested in can be beneficial (Source 3).
- **Stay curious and eager to learn:** Students suggested maintaining curiosity and a desire to learn new things to stay challenged in the co-op role (Source 2).
- **Networking and engaging with colleagues:** After being hired, students recommended engaging with colleagues, learning about their roles, and networking to make a good impression and explore career options (Sources 4 and 5).
- **Don't be intimidated:** One student reflected that they wished they hadn't been as intimidated when starting their first co-op and encouraged others to ask questions and put themselves out there (Source

5).

In summary, the advice includes applying widely and persistently, not hesitating to apply even if you don't meet all criteria, focusing on roles you are passionate about, staying curious, networking actively, and approaching the co-op with confidence.

writing job search documents and developing various strategies to engage in job search

- Seeking for a co-op work term: create applications, interview preparation, networking skills
- In the workplace: setting goals, navigating career directions, networking, learning on-the-job, etc.
- Return to academic studies: ways in which the co-op experience was helpful upon returning to school, how skills, knowledge, and competencies developed in the workplace were incorporated in academic studies, and impact of co-op experience on learning

BEFORE WRITING

- Only students who have worked for at least 2 companies are eligible to complete this assignment.
- Take a moment and reflect on the questions being asked in the form and think about what worked for you to successfully secure

n for it as side projects. As much as you're there to help the company, they can also utilize the skillset you bring to modernize business processes and to see

things from a different lens. Overall, students should stay curious and have a desire to continue to learn new things to stay challenged in their co-op role. Other Comments and/or Advice

9. Add any other comments or advice you may have here.

- Don't be afraid to apply for positions even if you don't have all the requirements the job posting is asking for.
- Co-ops and internships are a chance for you to explore different lines of business and get a chance to discover what you enjoy doing. Apply to positions that pique your interest!
- All the best of luck in your job hunt!

of the personal projects that they have completed. Searching for a Co-op Workterm 3. Job Search: Looking back on your own job search, what strategies did you find successful and would recommend to students? What would you have done differently in your approach to seeking? My best strategy for applying for co-ops was to apply for a lot of co-ops and be persistent about it, make sure you're checking for more job postings regularly, checking multiple job boards, applying for jobs that might be exactly what you want and applying the whole way through the semester. You're going to apply for a lot of co-ops before you get one, don't let that let you down. Be willing to try new things and keep submitting applications consistently and you'll get there. The one thing I think I could've done

7. After You Are Hired: Co-op is an opportunity to explore careers and to network. How would you encourage students to make the most of their co-op experience and form a good impression? Thinking back on your own co-op experience, what would you have done differently?

During your co-op, I recommend engaging with colleagues and taking the time to learn about their roles within the company. This not only leaves a positive impression but also demonstrates genuine interest. During my first co-op, I regretted not networking more and connecting with individuals in roles I was interested in. For example, since I was interested in systems engineering, I could have reached out to a systems engineer to learn more about their work.

8. Goal Setting: Creating work term goals
